

Putaran — clear space, minimum size, don'ts

Clear space

x = the stroke weight (same as the dot's diameter).
Keep 2x clear on every side of the symbol and of the lockup.

Lockup gap = 1.5x between symbol and wordmark.
Wordmark cap-to-baseline matches the symbol's arch height.

Minimum size

-  **Symbol 16 px** — favicon, bottom nav.
Print: 5 mm.
-  **24 px** — preferred UI size; below it, use the one-colour version.
-  **Lockup 96 px wide.** Print: 25 mm.

App icon keyline

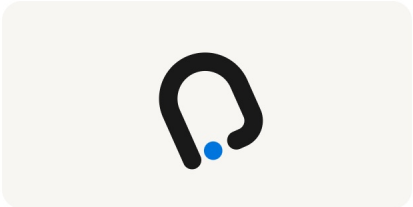

Symbol fills 65% of the tile,
centred optically. Fits Android
adaptive-icon safe zone and iOS
masks.

Don'ts

Don't stretch or squash

Don't rotate or flip

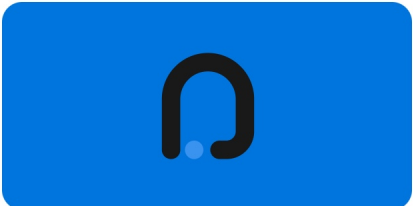

Don't recolour the loop or dot

Don't add shadows, glows or
gradients

Don't change the stroke weight

Don't place on low-contrast
colour

Don't set in caps or wide
tracking

Don't swap the font or reorder
